HARASHTRA STATE BOARD OF TECHNICAL EDUCATION, MUMBAI

TEACHING AND EXAMINATION SCHEME FOR POST S.S.C. DIPLOMA COURSES

COURSE NAME: DIPLOMA IN AGRICULTURE ENGINEERING

COURSE CODE: AU

DURATION OF COURSE : 6 SEMESTERS WITH EFFECT FROM 2012-13

SEMESTER: SIXTH DURATION: 16 WEEKS

PATTERN: FULL TIME - SEMESTER SCHEME: G

Student Contact Hours Per Week: 31 Hrs.

THEORY AND PRACTICAL PERIODS OF 60 MINUTES EACH.

Total Marks: 900

@ - Internal Assessment, # - External Assessment, No Theory Examination, \$ - Common with Other Branches

Abbreviations: TH-Theory, TU-Tutorial, PR-Practical, OR-Oral, TW-Term Work, SW-Sessional Work

- Conduct two class tests each of 25 marks for each theory subject. Sum of the total test marks of all subjects is to be converted out of 50 marks as sessional work (SW).
- > Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
- Code number for TH, PR, OR, TW are to be given as suffix 1, 4, 8, 9 respectively to the subject code.

Course Name: Diploma in Agriculture Engineering

Course code : AU
Semester : Sixth

Subject Title: Drainage Engineering

Subject Code: 17674

Teaching and Examination Scheme:

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|---------------|-----|-----------|-----------|-----|-------|
| TH | TU | PR | PAPER HRS. | TH | PR | OR | TW | TOTAL |
| 03 | | 02 | 03 | 100 | | | 50@ | 150 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

This subject is essential to equip the learner with the knowledge of drainage systems for agricultural lands and conservation of water for optimizing the agricultural production in the most efficient and economical ways. Problem of alkalinity and salinity affect the efficient drainage systems on farms and hence care has to be taken to minimize these. For effective drainage system it is essential to know about water table, Student must also know about basic designing aspects.

Objectives:

The students will be able to:

- 1. Identify the types of salt affected soils.
- 2. Know the causes of water logging and salt accumulation on the soil surfaces.
- 3. Understand the design procedures of surface and subsurface drainage systems.
- 4. Apply the drainage systems on the farms for safe removal of the excess water from the salt affected soils.

| Topic | Name of the topic and Contents | Hours | Marks |
|-------|---|-------|-------|
| • | Basics of Drainage | | |
| | 1.1 Introduction and Definition. | | |
| | 1.2 Types of drainage methods. | | |
| | 1.3 Objectives of drainage. | | |
| 0.1 | 1.4 Necessity of drainage. | 0.6 | 10 |
| 01 | 1.5 Benefits of drainage. | 06 | 12 |
| | 1.6 Drainage problems of the state and country. | | |
| | 1.7 Drainage requirements of various crops. | | |
| | 1.8 Causesand effect of water logging. | | |
| | 1.9 Prevention and control of water logging. | | |
| | Salt affected soils and their reclamation | | |
| | 2.1 Types of salt affected soils. | | |
| | 2.2 Chemical properties of soil. | | |
| | 2.3 Classification of salt affected soils. | | |
| 02 | 2.4 Leaching requirements and methods. | 06 | 12 |
| | 2.5 Gypsum requirements. | | |
| | 2.6 Salt balance. | | |
| | 2.7 Numericals on leaching requirements. | | |
| | Drainage investigation and requirements | | |
| | 3.1 Types of land requiring drainage. | | |
| | 3.2 Drainage properties (Structure, texture, Drainable porosity and | | |
| | Hydraulic conductivity). | | |
| | 3.3 Approach to the drainage problems. | | |
| 03 | 3.4 Basic information required for investigating drainage problems. | 10 | 20 |
| 05 | 3.5 Estimation of the drainage requirements. | 10 | 20 |
| | 3.6 Required water table depths. | | |
| | 3.7 Drainage depths for different crops. | | |
| | 3.8 Ground water contours and lowering of water tables. | | |
| | 3.9 Installations of Piezometer and observation wells. | | |
| | Design of Surface Drainage system | | |
| | 4.1 Different types of surface drainage systems. | | |
| | 4.2 Land smoothing, leveling and grading. | | |
| | 4.3 Drainage coefficients. | | |
| 04 | 4.4 Design considerations. | 10 | 22 |
| 01 | 4.5 Hydraulic design of open channel (drain). | 10 | 22 |
| | 4.6 Drainage criteria for steady and unsteady state. | | |
| | 4.7 Economic aspects of surface drainage systems. | | |
| | 4.8 Numericals on above topics. | | |
| | Design of Sub Surface Drainage system | | |
| | 5.1 Different types of sub surface drainage systems. | | |
| | 5.2 Components and layout of sub surface drainage systems. | | |
| | 5.3 Sub surface drainage materials (drainage pipes, drain envelop | | |
| | and drainage structures). | | |
| 05 | 5.4 Design of gravel envelops. | 14 | 30 |
| | 5.5 Equation of drain spacing (Hooghoudt's equation). | | |
| | 5.6 Hydraulic design of sub surface drainage systems. | | |
| | 5.7 Installation of sub surface drainage systems. | | |
| | 5.8 Numericals on above topics. | | |
| 06 | Special methods of drainage | 02 | 04 |

| 6.1 Vertical drainage through bore wells.6.2 Mole drains. | | | |
|--|-------|----|-----|
| 6.3 Drainage of irrigated lands in arid and semi arid areas. | | | |
| | Total | 48 | 100 |

Practical:

Intellectual skill:

- 1. Know method of determination of various properties and coefficients of soil and water
- 2. Cost analysis of surface and sub-surface drainage systems
- 3. Report writing

Motor skills:

- 1. Ability measure quantities accurately
- 2. Use appropriate tools for designing
- 3. Determine chemical properties

List of Practicals:

- 1. Determination of chemical properties of soil and water (Ec, pH, ESP and SAR).
- 2. In situ measurement of hydraulic conductivity by single augur hole method.
- 3. In situ measurement of hydraulic conductivity by Inverse augur hole method.
- 4. Determination of drainage coefficients.
- 5. Installation of Piezometer and observation wells.
- 6. Preparation of iso bath and iso bar maps.
- 7. Determination of drainable porosity by sand tank model.
- 8. Determination of drainable porosity by using field methods.
- 9. Design of surface drainage system.
- 10. Design of sub surface systems.
- 11. Cost analysis of surface drainage systems.
- 12. Cost analysis of subsurface drainage systems.
- 13. Visit to sub surface drainage project.
- 14. Visit to drainage material manufacturing industries.

Subject Title: Food Processing and Preservation

Subject Code: 17675

Teaching and Examination Scheme

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|--------------|-----|-----------|-----------|-----|-------|
| TH | TU | PR | PAPER HRS | TH | PR | OR | TW | TOTAL |
| 03 | | 02 | 03 | 100 | | | 25@ | 125 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

Business of agriculture is not complete without the post harvest and value addition to raw agricultural commodities. The share of value addition and processing is not available to the farmers, So far only 1% of farm commodities are processed in India which needs further boost. The losses of perishable farm produce is also very high (30 to 40%) and require knowledge of preservation. This is also true when production is high and prices fall down. Processing and preservation methods not only help retain quality, flavour and nutritional value of the food item but also add to their values.

Objectives:

The student will be able to,

- 1) Study importance and principle of food processing and preservation.
- 2) Know equipments and energy requirement of processing.
- 3) Study different methods of processing and preservation.
- 4) Study of causes of food spoilage.
- 5) Know chemicals for preservation of fruits and vegetables.

Practical:

Skills to be developed:

Intellectual Skills:

- 1. Knowledge an importance of processing.
- 2. Methods of processing and preservation.
- 3. Equipments and machinery for processing.
- 4. Knowledge of preservatevs.

Motor Skills:

- 1. Preparation of dehydrated products.
- 2. Handling of process equipments.
- 3. Making of vegetable preservation products.
- 4. Making of fruit products.

List of Practical:

- Study of different types of dryers used in food industry.
- Study of different type of pasteurizers.
- Study of different preservation methods.
- Study of canning of fruits and vegetables.
- Study of jam, jelly, carbonated beverages, pickles, chutney and sauces
- Visit to food processing plant: Submission of visit report.

Course Code : AU
Semester : Sixth

Subject Title: Alternate Energy Sources

Subject Code: 17676

Teaching and Examination Scheme:

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|--------------|-----|-----------|-----------|-----|-------|
| TH | TU | PR | PAPER HRS | TH | PR | OR | TW | TOTAL |
| 03 | | 02 | 03 | 100 | | | 25@ | 125 |

NOTE:

- > Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- > Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

Energy is an important aspect in all sectors of country's economy. The energy crisis is mainly caused due to increased population and enhanced standard of living and life style of people. The conventional sources of energy are insufficient to meet these demands. These are polluting the environment disturbing ecobalance. Hence, alternative energy sources are utilized for power production. The use of alternate energy sources is increasing day by day. Diploma engineers are expected to develop, operate and maintain these systems. It is therefore essential to know basics of energy conversion, conservation, and energy audit and waste heat recovery techniques.

Objectives:

The student will be able to,

- 1. Develop awareness for effective utilization of alternative energy sources.
- 2. Identify different components of solar energy and wind energy devices.
- 3. Identify and analyze biomass plant.
- 4. Identify and apply energy conservation techniques for commonly used power absorbing and generating devices.
- 5. Apply principles of energy conservation and energy management techniques.
- 6. Develop awareness about Energy Audits.

'G' Scheme

| Topic and Contents | Hours | Marks |
|---|-------|-------|
| Topic 1. Introduction to Energy Sources | | |
| 1.1 Introduction. | | |
| 1.2 Major sources of energy: Renewable and Non-renewable. | | |
| 1.3 Primary and secondary energy sources. | 06 | 12 |
| 1.4 Energy Scenario: | | |
| Prospects of alternate energy sources. | | |
| • Need of Alternate energy sources. | | |
| Topic 2. Solar Energy | | |
| 2.1 Principle of conversion of solar energy into heat and electricity | | |
| 2.2 Solar Radiation: Solar Radiations at earth's surface • Solar Radiation | | |
| Geometry: Declination, hour angle, altitude angle, incident angle, zenith | | |
| angle, solar azimuth angle | | |
| 2.3 Applications of Solar energy: - | | |
| • Construction and working of typical flat plate collector and solar | | |
| concentrating collectors and their applications, | 12 | 20 |
| • advantages and limitations | | |
| • Space heating and cooling. | | |
| Photovoltaic electric conversion. | | |
| Solar distillation, Solar cooking and furnace. | | |
| • Solar pumping and Green House. | | |
| Agriculture-Solar drying for foods | | |
| • (no derivations and numerical) | | |
| Topic 3. Bio-Mass | | |
| 3.1 Biomass: Generation and utilization, Properties of biomass, Agriculture | | |
| Crop & Forestry residues used as fuels, Combustion, Gasification, | | |
| Biomass gasifiers and types etc. | | |
| • Applications of Gasifiers to thermal power and Engines, Biomass as a | | |
| decentralized power generation source for villages | | |
| 3.2 Concept of Bio-energy: Bio-fuels, Biomass resources | 06 | 14 |
| • Bio-Chemical Conversion: Aerobic and Anaerobic conversion, | | |
| Fermentation etc. | | |
| 3.3 Bio-fuels: Types of Bio-fuels, Production processes and technologies, Bio | | |
| fuel applications, Ethanol as a fuel for I.C. engines, Relevance with Indian | | |
| Economy. | | |
| Topic 4. Biomethanation | | |
| 4.1 Importance of biogas technology, Different Types of Biogas Plants. | | |
| Aerobic and anaerobic bioconversion processes. | | |
| Various substrates used to produce Biogas (cow dung, human and other) | 05 | 10 |
| agricultural waste, municipal waste etc.) | 03 | 10 |
| Individual and community biogas operated engines and their use. | | |
| Application of Biogas in domestic, industry and vehicles. | | |
| Topic 5. Wind Energy | | |
| 5.1 Wind Energy: Basics & Power Analysis, Wind resource assessment, | | |
| 5.2 Wind Power estimation techniques, Principles of Aerodynamics of wind | | |
| turbine blade, various aspects of wind turbine design. | | |
| <u> </u> | 06 | 16 |
| 5.3 Main considerations in selecting a site for wind mills. | | |
| Advantages and limitations of wind energy conversion. 5.4 Classification of wind mills | | |
| | | |
| Construction and working of horizontal and vertical axis wind mills, | | |

| their comparison | | |
|---|----|-----|
| <u>*</u> | | |
| • Main applications of wind energy for power generation and pumping. | | |
| Topic 6. Geothermal Energy | | |
| 6.1 Availability of Geothermal Energy-size and Distribution, Recovery of | 04 | 10 |
| Geothermal Energy, Various Types of Systems to use Geothermal Energy. | 04 | 10 |
| 6.2 Direct heat applications, Power Generation using Geothermal Heat | | |
| Topic 7. Other Sources of Renewable Energy | | |
| 7.1 Hydrogen Energy | | |
| Hydrogen as a renewable energy source, Sources of Hydrogen, Fuel for | | |
| Vehicles. | | |
| Hydrogen Production: Direct electrolysis of water, thermal decomposition | | |
| of water, | | |
| 7.2 Fuel Cell | | |
| Fuel cell - Principle of working, construction and applications. | | |
| 7.3 Hydel Energy | 09 | 18 |
| Hydro power: Potential, Mini and Microhydel Power (MHP) Generation: | | |
| Classification of hydel plants, Concept of micro hydel, merits, Status in | | |
| India | | |
| 7.4 Nuclear Energy | | |
| Potential of Nuclear Energy, International Nuclear Energy Policies and | | |
| Regulations. | | |
| Nuclear Energy Technologies – Fuel enrichment, Nuclear Waste | | |
| Disposal. | | |
| Total | 48 | 100 |

Practical:

Skills to be developed;

Intellectual Skills:

- 1. Identify concept, parts of devices and their functions.
- 2. Understand the construction and working principle of Renewable energy systems.
- 3. Know function, classification and discrimination of parts or equipments.

Motor Skills:

- 1. Ability to observe / locate / operate various parts of instruments / equipments / tools.
- 2. Ability to accurately measure the various parameters.
- 3. Ability to follow the systematic procedure.
- 4. Ability to handle data and draw graphs.

List of Practicals:

- 1) To collect information about global and Indian energy market.
- 2) To perform an experiment on solar flat plate collector used for water heating.
- 3) To study and analyze performance of Solar street lighting System.
- 4) To study construction and working of photo voltaic cell.
- 5) To study construction, working and maintenance of solar cooker.
- 6) Visit to plant of solar heating system for hotel/hostel/railway station etc.
- 7) To study construction and working of horizontal axis wind mill or to visit a nearest wind farm.
- 8) To visit a biomass/ biogas plant of municipal waste or else where.

Learning Resources:

1. Books:

| Sr. No. | Author | Title | Publisher |
|------------|-------------------|--------------------------------------|--------------------|
| 1 | Dr B. H. Khan | Non conventional energy Resources | Tata McGraw Hill |
| 2 | G. D. Rai | Non conventional energy sources | Khanna publication |
| 3 | S. P. Sukhatme | Solar energy | Tata McGraw Hill |
| 4 | H. P. Garg | Solar energy | Tata McGraw Hill |
| 5 | Arrora Domkundwar | Power plant engineering | Dhanpat Rai & Co. |

2. CDs, PPTs, Models, Charts etc. Websites:

- 1. CDs developed by National Power Training Institute, (Under the ministry of Power, Government of India) Opposite VNIT, South Ambazari road, Nagpur
- 2. Website of Bureau of Energy and Efficiency. (www.bee-india.nic.in)
- 3. Website for Akshay Urja News Bulletin. (www.mnes.nic.in)

Course Name: Diploma in Agriculture Engineering

Course Code : AU
Semester : Sixth

Subject Title: Protected Cultivation

Subject Code: 17677

Teaching and Examination Scheme:

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|--------------|-----|-----------|-----------|-----|-------|
| TH | TU | PR | PAPER HRS | TH | PR | OR | TW | TOTAL |
| 03 | | 02 | 03 | 100 | | 25# | 25@ | 150 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

Recent developments have clearly indicated that effect of environment like air pollution, uncertain weather conditions, and water scarcity is affecting the yield and quality of crops, fruits, vegetables, flowers etc. Therefore it has become necessary to use protected cultivation methods in farming. The student, therefore must understand the principles, theoretical aspects and developing skills in protected cultivation

This subject covers basics of protected farming which includes development of green houses, polyhouses and methods adopted for cultivation in such restricted conditions.

Objectives:

The student will be able to:

- 1. Understand plant response to Greenhouse environment
- 2. Plan and design of greenhouses
- 3. Select appropriate material for construction of greenhouse
- 4. Select crops to be cultivated under greenhouse

| Topic 1. Greenhouse Technology 1.1 History of green house, advantages of Green house, Greenhouse effect. 1.2 Greenhouse - World scenario, Indian situation: present and future. 1.3 Different agro - climatic zones in India. 1.4 Environmental factors and their effects on plant growth Topic 2. Greenhouse Design 2.1 Basics of greenhouse design, different types of structures – glasshouse, shade net, poly tunnels. 2.1 Classification of Green houses on the basis of shape, construction, covering material (Glazing material). 2.2 Planning and design of greenhouse: Site selection and orientation, basics of structural design, covering materials. Construction materials (Wood, G.I., Aluminum, Steel, RCC, Glass). 2.4 Design and development of low cost greenhouse. 2.5 Energy Management Topic 3. Growth Media 3.1 Introduction, principles, chemical properties 3.2 Properties of root media. 3.3 Soil culture, types of soil, 3.4 Drainage, Flooding And Leaching, 3.5 Soil pasteurization in moss / Coco pith and mixtures, 3.6 Rock Wool and other inert media. Topic 4. Green House Environment 4.1 Interaction of light, temperature, humidity, CO ₂ , water on crop regulation 4.2 Greenhouse heating, cooling, ventilation and shading. 4.3 Types of ventilation- Forced cooling techniques - Glazing materials 4.4 Micro irrigation and Fertigation. Topic 5. Greenhouse Heating and Cooling 5.1 Necessity of heating 5.2 Methods of controlling temperature in greenhouse 5.3 Equipment required for heating and controlling temperature. 5.4 Methods of Greenhouse Cooling: Ventilation, Ventilation with roof and side ventilators. 5.5 Roof shading, 6.6 Evaporative cooling (EC): (a) Fan and Pad system (b) High pressure mist system, (c) Low pressure mist system 5.7 Greenhouse Irrigation System: Rules of watering, Hand Watering, Perimeter Watering, Overhead Sprinklers, Boom Watering, Drip Irrigation Topic 6. Agricultural Structures 6.1 Farm stead:- Location, Types of farm stead (Dairy Barns, Stanchan Barns) 6.2 Poultry Houses: - Deep li | | Topic and Contents | Hours | Marks |

List of Assignments:

- 1. Study of different types of greenhouses based on shape, construction and glazing materials.
- 2. Calculation of air rate exchange in an active summer cooling system.
- 3. Calculation of air rate exchange in an active winter cooling system.
- 4. Visit to commercial green houses.
- 5. Study of dairy barns and poultry houses.
- 6. Design of water supply system for ideal farm houses.

Course Name: Diploma in Agriculture Engineering

Course Code : AU
Semester : Sixth

Subject Title: Energy Conservation and Audit

Subject Code: 17678

Teaching and Examination Scheme:

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|---------------|-----|-----------|-----------|-----|-------|
| TH | TU | PR | PAPER HRS. | TH | PR | OR | TW | TOTAL |
| 03 | | 02 | 03 | 100 | | -1 | 25@ | 125 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Seasonal Work (SW).

Rationale:

Technological development in all sectors has caused imbalance in energy generation and it's consumption. Energy conservation is a scientific tool provided to minimize the energy imbalance. This is one of the rapid emerging field in the area of electrical engineering hence this has been included as core technology subject.

The contents on energy conservation techniques in lighting systems, motors, transformers and transmission - distribution lines will be useful to reduce energy losses and wastage in residential, commercial and industrial sectors.

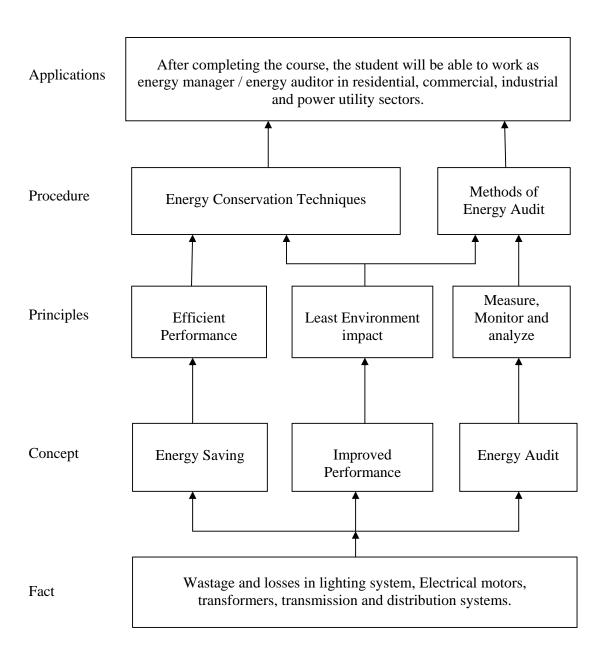

The topic on energy audit will be a useful tool to participate in energy conservation program of the nation.

General Objectives:

The students will be able to:

- 1. Identify the energy losses and wastage.
- 2. Suggest the energy conservation techniques in various sectors.
- 3. Find the opportunity for saving in energy consumption through tariff structure.
- 4. Prepare energy audit report.

Learning Structure:

| Topic and Contents | Hours | Marks |
|--|-------|-------|
| Topic 1 : Energy Conservation | | |
| Specific Objectives: | | |
| Identify the need of Energy Conservation. | | |
| State functions of Government organization working for ECA. | | |
| Contents: | | |
| 1.1 Preset energy scenario. | 02 | 04 |
| 1.2 Need of energy conservation. | | |
| 1.3 State the meaning of term Energy Conservation. | | |
| 1.4 Energy Conservation Act – 2003. | | |
| 1.5 Functions of Government Organization (NPC, MNRE, BEE, | | |
| MEDA). | | |
| Topics 2: Energy Conservation in Lighting system | | |
| Specific Objectives: | | ļ |
| Assess existing lighting system | | |
| Identify energy conservation techniques in lighting system. | | |
| Suggest methods to improve energy conservation | | |
| Contents: | | |
| 2.1 Basic terms used in Lighting system (Illumination). | | |
| 2.2 Recommended Luminance levels | | |
| 2.3 Procedure for assessing existing Lighting system in a facility. | 06 | 12 |
| 2.4 Energy Conservation techniques in lighting system. | | 12 |
| By replacing Lamp sources. | | |
| Using energy efficient luminaries. | | |
| Using light controlled gears. | | |
| By installation of separate transformer / servo stabilizer for | | |
| lighting. | | |
| Periodic survey and adequate maintenance programs. | | |
| Energy Conservation techniques in fans, Electronic regulators. | | |
| Topic 3 : Energy Conservation techniques in Electrical Motors | | |
| Specific Objectives: | | |
| > Select electrical motors for suitable application. | | |
| Energy conservation techniques for improving the performance of | | |
| motor by various methods. | | |
| Contents: | | |
| 3.1 Construction, Power flow and working of Induction motor. | 06 | 14 |
| 3.2 Factors governing the selection of Induction motor. | | |
| 3.3 Need for energy conservation in Induction motor. | | |
| 3.4 Various energy conservation techniques in Induction motor. | | |
| By improving Power quality. | | |
| By motor survey. | | |

| D | I | |
|---|----|----|
| By matching motor. | | |
| By minimizing the idle and | | |
| o Redundant running of motor. | | |
| By operating in star mode. | | |
| By rewinding of motor. | | |
| By improving mechanical | | |
| Power and transmission | | |
| o Efficiency. | | |
| 3.5 Energy Efficient motors. | | |
| Comparison with conventional Induction motor | | |
| Topic 4: Energy Conservation techniques in transformer. | | |
| Specific Objectives: | | |
| ➤ List out the methods to improve performance of transformer. | | |
| Suggest energy conservation techniques to improve transformer | | |
| performance | | |
| | | |
| Contents: | | |
| 4.1 Need of energy conservation in transformer. | | |
| 4.2 Methods (related to material, design) to improve the performance of | | |
| transformer. | 04 | 08 |
| 4.3 Energy conservation techniques related to transformer. | | |
| Loading sharing | | |
| Parallel operation | | |
| Isolating techniques | | |
| 4.4 Energy efficient transformers. | | |
| Amorphous transformers | | |
| Epoxy Resin cast transformer (Dry type of transformer). | | |
| Periodic maintenance. | | |
| Topic 5 : Energy conservation in transmission and distribution | | |
| system. | | |
| Specific Objectives: | | |
| > State scenario of losses in transmission and distribution system | | |
| Identify Energy conservation opportunities | | |
| Suggest methods for energy conservation. | | |
| Contents: | | |
| 5.1 Scenario of transmission and distribution losses at state level, | | |
| national level and at global level. | | |
| 5.2 Types of losses in transmission and distribution system | | |
| (commercial and technical losses) | | |
| 5.3 Energy conservation techniques in transmission and distribution | 06 | 12 |
| system related to technical losses. | | |
| By reducing I²R losses. | | |
| • | | |
| By compensating reactive power flow. By antimining distribution. | | |
| By optimizing distribution The state of the state o | | |
| o voltage. | | |
| By balancing phase currents. **Control of the control of the | | |
| By using energy efficient | | |
| o transformers. | | |
| 5.4 Energy conservation techniques related to commercial losses. | | |
| | | |

| | 1 | |
|--|-----|----|
| Topic 6: Relation Between Tariff and Energy Conservation. | | |
| Specific Objectives: | | |
| ➤ Identify the opportunities to reduce energy bill through selection of tariff structure | | |
| Select appropriate tariff structure to reduce energy bill | | |
| Contents: | | |
| 6.1 Types of tariff structure. | | |
| 6.2 Terms involved in tariff. | | |
| 6.3 Specific tariff: | 06 | 14 |
| Time-off-day tariff | | |
| Peak-off-day tariff | | |
| Power factor tariff | | |
| Maximum Demand tariff | | |
| Load factor tariff | | |
| | | |
| 6.4 Application of tariff system to reduce energy bill. | | |
| 6.5 Simple numerical based on power factor and load factor tariff. | | |
| Topic 7: Energy Conservation by Cogeneration | | |
| Specific Objectives: | | |
| Classify cogeneration systems. | | |
| > Selection of appropriate cogeneration system to reduce energy bill | | |
| Contents: | | |
| 7.1 What is cogeneration? | | |
| 7.2 Need for cogeneration. | | |
| 7.3 Classification of cogeneration system on the basis of sequence of | 0.4 | 10 |
| energy use. | 04 | 12 |
| Topping cycle | | |
| Bottoming cycle 7.4 Classification of accounting protein and the basic of technology. | | |
| 7.4 Classification of cogeneration system on the basis of technology. | | |
| • Steam turbine cogeneration. | | |
| Gas turbine cogeneration | | |
| • Reciprocating engine cogeneration. | | |
| 7.5 Factors governing the selection of cogeneration system. | | |
| 7.6 Advantages of cogeneration. | | |
| Topic 8: Energy Conservation Equipment. | | |
| Specific Objectives: | | |
| List out energy conservation equipments. | | |
| > Select proper energy conservation equipments in various | | |
| applications. | | |
| Contents: | | |
| 8.1 What is energy conservation equipment? | | |
| 8.2 Energy conservation equipment related to Lighting system. | | |
| Centralized Control Equipment (Microprocessor based). | 06 | 12 |
| Occupancy sensors/Motion Detectors. | | |
| Occupancy sensors/Motion Detectors. Control gears: Dimmers, Regulators, and Stabilizers). | | |
| 8.3 Energy conservation equipment related to electrical motors: | | |
| Construction, working and advantages of each energy conservation | | |
| Equipment listed below: | | |
| Soft starter: For induction motors | | |
| | | |
| Power Factor Controller Static connectors | | |
| Static capacitor | Ì | |

| Total | 48 | 100 |
|---|----|-----|
| 9.6 Calculation of simple pay back period (Simple numerical) | | |
| 9.4 ABC analysis and it's advantages referred to energy audit projects. 9.5 Energy Audit procedure (walk through audit and detailed audit). | | |
| 9.4 ABC analysis and it's advantages referred to energy audit projects. | | |
| 9.3 Prepare questionnaire for energy audit projects. | | |
| 9.1 Energy flow diagrams and its significance.9.2 Energy audit instruments and their use. | | |
| | | |
| Contents: | 00 | 12 |
| Write energy audit report. | 08 | 12 |
| Calculation of simple pay back period. | | |
| Apply ABC analysis in energy projects. | | |
| Prepare/Develop questionnaire for energy audit. | | |
| Select energy audit instruments. | | |
| Specific objectives: | | |
| Topic 9 : Energy Audit. | | |
| Automatic Power Factor controller. | | |
| KVAR Controller | | |
| Maximum Demand Controller | | |
| principle and operation of | | |
| 8.4 Energy conservation equipments in T&D system: Working | | |
| Variable Frequency Drives. | | |
| Automatic star delta starter | | |

Practical:

Skill to be developed:

Intellectual Skills:

- 1. Identify different methods used for energy conservation.
- 2. Understand the importance of energy conservation.
- 3. Select proper tariff for given industry/institute.
- 4. Collect technical information regarding electricity act.

Motor Skills:

- 1. Prepare energy audit report.
- 2. Write visit report.
- 3. Use different methods of energy conservation.
- 4. Use of energy saving devices.

List of Practicals:

- 1. Collect the information about energy conservation act from IEE 2003.
- 2. Prepare a write up on role of Energy Manager and Energy Auditor.
- 3. Collect of information by market survey and prepare report on rating, luminous output, cost, list of manufacturers of various types of energy efficient luminaries (FTL, CFL, LED, Sodium Vapour, HPMV etc.)
- 4. Make a comparative study of energy efficient control gears and ballasts used in lighting system on the basis of energy efficiency, cost, life, energy saving and saving in energy bill
- 5. Visit to any organization where energy conservation program is implemented (Hospitals, workshops, institutes, commercial building, residential building etc.)
- 6. Using various energy audit instruments used for measurement of electrical, mechanical and thermal energy parameters, carryout energy audit and prepare a report as a case study for Residence, Small workshop, Public Library, Hospital etc.

w.e.f Academic Year 2012-13 'G' Scheme

Course Name: Diploma in Agriculture Engineering

Course Code : AU
Semester : Sixth

Subject Title: Extension Methods of Transfer of Technology

Subject Code: 17679

Teaching and Examination Scheme:

| Teaching Scheme | | | | Examinati | on Scheme | | | |
|-----------------|----|----|---------------|-----------|-----------|----|----|-------|
| TH | TU | PR | PAPER HRS. | TH | PR | OR | TW | TOTAL |
| 03 | | | 03 | 100 | | | | 100 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Seasonal Work (SW).

Rationale:

The course is expected to enrich students knowledge for disseminating and transfer of agril and allied technology effectively. The student should communicate effectively with end user of technology and receive the feedbacks. The subject contents will enable the student for planning and evaluating of programmes. It also help to build technical competence for capacity building of farmers.

Objectives:

The student will be able to:

- 1) Achieve effective transfer of new technology.
- 2) Understand methods of technology disseminating and communicating.
- 3) Develop process for capacity building of farmers and extension workers.
- 4) Know programme planning and evaluating.

| Topic and Contents | Hours | Marks |
|--|-------|-------|
| Topic 1: Extension Education | | |
| 1.1 Extension Education: | | |
| Meaning and definition | | |
| • Scope | | |
| Objectives | | |
| • principles | 07 | 10 |
| 1.2 Communication | | |
| Meaning and definition | | |
| Models, Elements and their Characteristics, Barriers in | | |
| Communication | | |
| Transfer of Technology (TOT): Meaning and definition | | |
| Topic 2: Extension Programme Planning | | |
| Meaning and definition of Planning | | |
| Programme and Project | 04 | 10 |
| Importance of Extension Program Planning | 04 | 10 |
| Principles and steps in Programme Planning Process | | |
| | | |
| Topic 3. Monitoring and Evaluation | | |
| 3.1 Monitoring | | |
| Meaning and definition | | |
| Modes of monitoring : | 04 | 10 |
| 3.2 Evaluation | | |
| Meaning and definition | | |
| • Types, | | |
| Difference between Monitoring and Evaluation | | |
| Topic 4. Extension Teaching Methods | | |
| 4.1 Meaning and definition | | |
| Functions and Classification | | |
| 4.2 Individual Contact Methods | | |
| Farm and Home Visit | | |
| Method and Result Demonstration | | |
| Demonstration of Field Trials | | |
| Merits and Demerits of Individual contact methods | | |
| 4.3 Group Contact Methods | | |
| Group discussion | | |
| Method Demonstration | | |

w.e.f Academic Year 2012-13 'G' Scheme

Course Name: Diploma in Agriculture Engineering

Course Code : AU
Semester : Sixth

Subject Title: Seed Process Engineering

Subject Code: 17810

Teaching and Examination Scheme:

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|---------------|-----|-----------|-----------|----|-------|
| TH | TU | PR | PAPER HRS. | TH | PR | OR | TW | TOTAL |
| 03 | | | 03 | 100 | | | | 100 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Seasonal Work (SW).

Rationale:

Seed is the basic and most critical input for sustainable agriculture. The response of all other inputs depends on quality of seeds to a large extent. It is estimated that the direct contribution of quality seed alone to the total production is about 15 - 20% depending upon the crop and it can be further raised up to 45% with efficient management of other inputs. The developments in the seed industry in India, particularly in the last 30 years, are very significant. Seed means life, and life needs cautiousness to grow. Processing of seeds is a matter of experience and in depth knowledge of various products and particular processes ideally suited to the specific processing task. Gentle handling, knowledge of seed processing and equipments, seed treatment, certification, packaging, storage, strict and genuine separation of different lots as well as highly accurate final purity and uniformity are the main supporting pillars of our approach, thus bringing us into the World market leader's position on the sensitive seed processing sector.

Objectives:

The student will be able to:

- 1) Know processing principles
- 2) Identify processing equipment and know their working
- 3) Learn to use seed treatment and testing of seeds
- 4) Know packaging and storage of seed.
- 5) Know the process of seed certification

| | Total | 48 | 100 |

Practical:

Skills to be developed:

Intellectual Skills:

- 1. Select method for Processing for good quality seed.
- 2. Select equipment used for seed processing.
- 3. Use appropriate Packaging and storage.

Motor Skills:

- 1. Seed cleaning and grading.
- 2. Handling seed processing equipments.
- 3. Seed treatments.
- 4. Seed testing.
- 5. Packaging of seed.

List of Practicals:

- 1. Study operation of grain pre-cleaners through samples.
- 2. Study operation of grain cleaner-cum-grader through actual use.
- 3. Study of indented cylinder separator: Operation, safety precautions, limitations.
- 4. Study of specific gravity separator: Operation, safety precautions, limitations.
- 5. Study of seed treater.
- 6. Study of seed bagging operations (Weighing, bagging, stitching, labeling)
- 7. Seed sample testing (moisture content, physical purity and germination.)
- 8. Study of operational process flow chart for seed processing.
- 9. Study of seed storage.
- 10. Visit to seed processing plant / Ware house : Visit report including layout.

Learning Resources:

w.e.f Academic Year 2012-13 'G' Scheme

Course Name: Diploma in Agriculture Engineering

Course Code : AU
Semester : Sixth

Subject Title: Operation, Maintenance & Testing of Farm Equipment

Subject Code: 17810

Teaching and Examination Scheme:

| Teaching Scheme | | | | | Examinati | on Scheme | | |
|-----------------|----|----|---------------|----|-----------|-----------|-----|-------|
| TH | TU | PR | PAPER HRS. | TH | PR | OR | TW | TOTAL |
| | | 02 | | -1 | 50# | | 25@ | 75 |

NOTE:

> Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.

> Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Seasonal Work (SW).

Rationale:

The diploma holder should know the complete operation and maintenance of the farm machinery and equipment. All tests procedures are also to be known to the diploma engineer. In this subject all such details are covered. The student will be well conversant with all operations and testing procedures after studying this subject. This subject is to be taught through practicals so that required hands on skills also will be developed.

Objectives:

The student will be able to:

- 1. Operate farm equipments including tractor.
- 2. Find the faults and repair the machinery and equipments.
- 3. Observe all safety rules.

Note: Related theory to be taught during practicals

Topic and Contents

1.Tractor:

- Familiarization with different makes & models of 4-wheeled tractors.
- Introduction to various systems of a tractor viz. fuel, lubrication, cooling, electrical, transmission, hydraulic & final drive system.
- Familiarsation with instrumentation panel & controls;
- Familiarization with tractor controls and learning procedure of tractor starting and stopping. Starting and stopping practice of the tractor
- Driving in forward and reverse gears.
- Hitching, adjustments, settings and field operation of farm machinery

2. Driving of Tractors and use of implements

- Road signs, traffic rules, road safety, driving and parking of tractor; Tractor driving practice forward & reverse driving practice;
- Tractor driving practice with two wheeled tractor trailer forward and reverse driving
- Study and practicing the hitching and detaching of implements
- Study operation and field adjustments of M. B. Plough and Disk Plough
- Field operation of trailing and mounted disk harrow, tine cultivator and ridger
- Field operation and adjustments of seed drill/planter/sprayer.

Practical:

Skills to be developed:

Intellectual Skills:

- 1. Interpret the road signs and traffic rules for safe driving.
- 2. Know the procedure of hitching and de-hitching of implements.
- 3. Know the operation and adjustments of various implements.
- 4. Select the implement for specific operation.

Motor Skills:

- 1. Drive following all safety and traffic rules/norms.
- 2. Attach properly the implements for safe operation.
- 3. Operate the tractor and farm implements efficiently and safely.

Practicals:

- 1. Familiarization with tractor controls and learning procedure.
- 2. Familiarization with tractor driving safety rules. Familiarization with tractor driving in forward and reverse gears.
- 3. Familiarization with tractor hitching system. Field operation with M. B. plough & its adjustment.
- 4. Field operation with disc plough and its adjustment.
- 5. Field operation with seed drill / planter and its adjustment.
- 6. Field operation with tractor trolley (forward and reverse).
- 7. Field operation with tractor operated disc harrow, tine cultivator and ridger and its adjustments.
- 8. Field operation with tractor operated rotavator and its adjustment.
- 9. Field operation with reaper and its adjustment.
- 10. Field operation with mower and its adjustment.
- 11. Familiarization with power tiller driving in forward and reverse gear.
- 12. Familiarization with tractor operated sprayer.

Course Name: Diploma in Agriculture Engineering

Course Code : AU

Semester : Sixth

Subject Title : Project

Subject Code: 17811

Teaching and Examination Scheme:

| Teac | ching Sch | neme | | | Examinati | on Scheme | | | |
|------|-----------|------|--------------|------------------|-----------|-----------|-----|-----|--|
| TH | TU | PR | PAPER HRS | THE PRESENTATION | | | | | |
| | | 04 | | | | 50# | 50@ | 100 | |

Rationale:

Project work aims at developing skills in the students whereby they apply the totality of knowledge and skills gained through the course in the solution of particular problem or undertaking a project. The students have various aptitudes and strengths. Project work, therefore, should match the strengths of students.

Objectives:

The student will be able to,

- 1. Analyze the given problem.
- 2. Generate alternative solutions to the problem.
- 3. Compare & select feasible solutions amongst alternative generated.
- 4. Develop and manufacture new/modified equipments.
- 5. Acquire technical knowledge beyond curriculum.

CONTENT:

The project should be taken in close collaboration with the employing agencies. The project shall involve selection, analysis and solution of special problems related to farm implement, machinery and power/soil and water engineering/agricultural process engineering applicable to Indian conditions.

• The project will be assigned to individual student or to a group of students not exceeding 5 as per problem.

Project will consist of any one of:

- (a) Rural Development
- (b) Operation of agricultural machinery: power tiller and tractors.
- (c) Problem concerning to any one of the following:
 - Run own workshop for repair and maintenance of agricultural implements.
 - Levelling and Irrigation-Drainage and soil-water conservation needs of farms.
 - Establish an agro based small scale rural industry.
 - Any other problem concerning agriculture.
- (d) Any other similar project related to Agricultural Engineering

At the end of the project student will submit a written report of his/ their accomplishment and face a viva voce examination individually.

Following activities related to project are required to be dealt with, during this semester

- 1. The Selection and preliminary work regarding Project to be done as per the direction of the Project Guide, who will be guiding the students for project work
- 2. The identified projects are executed during the semester as per the Guidance from the project Guide by the group of students (Group size max. 5 students).
- 3. Maintain the project diary individually for the activities performed in the format specified below.

Project Diary format:

| Sr. No. | Date | Activity Carried out | Remarks | Signature of Guide |
|------------|------|----------------------|---------|--------------------|
| | | | | |
| | | | | |
| | | | | |

Note:

Project should provide viable and feasible solution to the problem identified.

Report should be of 40 To 50 pages.

Project report contents should be as follows:

- 1. Main title: 14 bold Times new roman
- 2. Sub titles: 12 bold Times new roman
- 3. Running matter: 12 Times new roman, paragraph 1.5 line spacing,
- 4. Margin spacing 4 cm (1.5 inches) from left and 2.5 cm (1 inch) from other sides. The report should be on A 4 size paper.

Preferably actual photographs / video clips showing progress of project work at different stages (to be added to project report).

Suggested framework for the project report:

The topics / contents of the project report should be as follows

- **♣** Abstract
- **♣** Topic introduction / Philosophy
- ♣ Literature Survey / Methodology adopted
- ♣ Principle (aim objectives of the Project work)
- ♣ Data collection / Design consideration/Basic Framework / Design / Drawing
- ♣ Manufacturing Processes and Process Sheets (if relevant)
- ♣ Assembly (if relevant)
- ♣ Performance / Calculations etc. (If relevant)
- **♣** Costing
- **4** Results and Discussion
- **♣** Conclusion
- **♣** Future Scope
- ♣ Bibliography/ References
