COMPREHENSION**

LISTENING COMPREHENSION

EXCERCISE-1

A Image Based Visual Serving for Welded Metal Based On Structured Light Vision

An intelligent system is developed for fillet welded metal. Structured light vision is employed in order to find the defects in the welded metal. The Light Emitting Diode (LED) is going to emit the light in the welded metal and during the time the image will be captured using the web camera. Then the captured image will be stored in the system and precede using the MATLAB software. The SOBEL edge detection method is used in this in order to convert the image in to edges where it contains 1's and 0's. And then finally RADON transformation is used in order to take the different projection of the image and to see were the defect lies in the welded metal. Moreover, different colors of LED are used in order to check in which LED color the defect is identified clearly

EXCERCISE-2

A NEW AGE EFFICIENT ENERGY SENSOR ROUTING SCHEME FOR HOME AUTOMATION

In the emerging ubiquitous home, sensors will be placed everywhere in the house and collect various physical data such as temperature, humidity, and light to provide information to consumer electronics devices. The devices are then automatically activated if necessary. For example, the ventilator works when the air is foul and the heating system performs according to the weather and the existence of people in the house. Because sensors have limited battery power, energy-efficient routing is important. In this paper, we present a new sensor routing scheme that provides energy-efficient data delivery from sensors to the home base station. The proposed scheme divides the home area into sectors and locates a manager node to each sector. The manager node receives collected data from sensors and delivers the data to the base station through the shortest path of the 2-dimensional (x, y) coordinates. Performance results show that the proposed scheme reduces energy consumption significantly compared with conventional sensor routing schemes.

EXCERCISE-3

ACCIDENTAL PREVENTION AND DETECTION OF VEHICLES USING MEMS ACCELEROMETER AND SENSORS

Wireless black box using MEMS Accelerometer, IR sensor, vibrating sensor. Ultrasonic sensor and GPS tracking system is developed for accidental prevention and monitoring of vehicles. This system consists of cooperative components of an accelerometer, Microcontroller unit, Sensors, GPS device and GSM module. It helps in detection of Accident and helps in prevention. If the accident occurs, this wireless device will send mobile phone short message indicating the position of vehicle by GPS system to family member, emergency medical service (EMS) and nearest hospital. The threshold algorithm and speed of vehicle are used to determine fall or accident in real-time. The system is compact and easy to install under rider seat using robust case.

READING COMPREHENSION

READING COMPREHENSION

EXERCISE-1

Read the passage given below and answer the question that follows:

Sight is our most precious sense and many people fear blindness more than they fear any other disability. Eye, the organ of sight is our most important organ for locating and observing the world around us. We use our eyes in almost everything we do ---reading, working, watching movies and television, playing games and countless other activities.

The human eyeball measures only about 25 mm in diameter. Yet the eye can see objects as far away as a star and as tiny as a grain of sand. The eye can quickly adjust its focus between a distance point and a near one.

I. Answer the following questions

1. What is our most precious sense?
2. Which disability the people fear most?
3. What is the chief function of the organ of sight?
4. Name a few activities in which we use our eyes?
5. What is the average measurement of the human eye ball?

Answers

1. Eye is our most precious sense.
2. Blindness is the disability which people fear most.
3. The chief function of the organ of sight is to locate and observe the world around us.
4. Reading, working, watching movies and television, playing games are some activities in which we use our eyes.
5. The human eyeball measures only about 25 mm in diameter.

II. Give a synonym for each of the following words.

WORDS

1. Precious
2. Tiny
3. Quickly
4. Countless
5. Disability

SYNONYMS

- -----

III. Give an antonym for each of the following words

WORDS

1. Far
2. Disability
3. Countless
4. Precious
5. tiny

ANTONYMS

- -----

ANSWER

SYNONYMS

1. Costly, very valuable
2. Very minute, small particle.
3. Very soon
4. Numerous
5. Physical or mental handicap.

ANTONYMS

1. Small distance
2. Ability
3. Countable
4. Low value
5. Large

EXERCISE-2

Read the passage given below and answer the question that follows:

Bees are insects. Bees are special insects because they can fly! They can move through the air like an aero plane! Bees can fly because they have wings. They use their wings to fly. Bees can fly fast. Bees can also fly slowly. They can fly up and they can fly down. They need to fly to get to flowers!

Bees can have three colors. They can be yellow, red and orange. All bees are black in some places. Bees have three main parts. They have a head. They have a body and they have a stinger. The stinger is used to defend against enemies. They also have six legs. They use their legs to stand and climb. They also use their legs to eat and collect pollen. Bees live in many places. They live in Africa Australia Asia Europe America. They only continent that bees don't live on are Antarctica! If you don't bother them, they will not bother you. Having fun watching the bees this summer.

Questions

1. What are bees?
 - a. Mammals
 - b. Birds
 - c. Reptiles
 - d. Insects**
2. How do bees fly?
 - a. They use their legs
 - b. They use their head
 - c. They use their wings**
 - d. None of above
3. How many legs do bees have?
 - a. Two
 - b. Four
 - c. Six**
 - d. Eight

4. What is the stinger used for?
 - a. To eat food
 - b. To defend against enemies**
 - c. Both A and B
 - d. None of the above
5. Where do bees live?
 - a. America
 - b. Asia
 - c. Antarctica
 - d. Both A and B**

II. Vocabulary

1. Bees are special. This means.....
 - a. Bees are normal
 - b. Bees are regular
 - c. Bees are unusual**
 - d. Bees are average
2. Bees can fly. This means.....
 - a. Bees can move through the air**
 - b. Bees can dig in the ground
 - c. Bees can see very far
 - d. Bees can swim through the water
3. What is the meaning of defend?
 - a. Run
 - b. Protect**
 - c. Sleep
 - d. Read

VOCABULARY

VOCABULARY

Identify the synonym from the alternatives given

1. He moved to America to start his life **afresh**.
a) Renewed b) started c) commenced d) anew.
Ans: Anew
2. She filed for divorce because she was married to a **sadist**.
a) misery person b) cunning person c) stupid d) cruel person
Ans: cruel person
3. The nights are clear but **suffused** with sloth and sullen expectation.
a) Covered b) colored c) filled d) spread over
Ans: spread over
4. The actor's sitting room was luxurious and **flamboyant**
a) Costly b) congested c) ostentatious d) elevated
Ans: ostentatious
5. The meeting started with a **mellifluous** prayer sung by a couple of girls.
a) Low tone b) sharp c) enticing d) sweet sounding
Ans: sweet sounding
6. President Obama is getting ready to **retaliate** against those behind the worst terrorist strikes in recent times.
a) Vindicate b) reconcile c) take revenge d) return
Ans: take revenge
7. The **cautious** are not always cowards.
a) Thrifty b) anorexic c) circumspect d) vigilant
Ans: circumspect
8. The **luxuriant** growth of flowers in our garden surprised the visitors.
a) Showing luxury b) abundant c) multicolored d) sweet smelling
Ans: abundant
9. His **officiousness** was disliked by one and all among his colleagues.
a) In the manner of an officer b) haughty look c) interfering in a domineering way
d) efficiency in doing the work
Ans: interfering in a domineering way
10. The **sedentary** job made him obese and led to diabetes.
a) hard b) detestable c) irregular d) inactive
Ans: inactive

Jumbled Sentence

REARRANGING JUMBLED WORDS TO MAKE SENTENCE

Exercise -1

1. Writing system telephone am to I about banking your and complain
Correct answer: I am writing to complain about your telephone banking system.
Extra word: and
2. I tried four details this week to system access feel to account my times have use the
Correct answer: I have tried four times this week to use the system to access my account details.
Extra word: feel
3. Crashed on the system been that each informed this computer has have occasion
Correct answer: on each occasion I have been informed that the computer has crashed.
Extra word: this
4. Branch day person unable to working I am I bank my as during the visit
Correct answer: as a working person I am unable to visit my branch during the day.
Extra word: I
5. I access do addition service have so internet use cannot great theta in your not online
Correct answer: in addition I don't have access to the internet so cannot use your online service.
Extra word: great

Correction of errors

Correction of Errors

Exercise-1

1. Shell becoming soon so don't worry.
Answer: She'll be coming soon, so **don't** worry.
2. She likes dogs, but she don't like cats
Answer: She likes dogs, but she **doesn't** like cats.
3. I just bought my sisters old house for too millions dollars.
Answer: I just bought my **sister's** old house for **two** million dollars.
4. When I get home, I will make dinner.
Answer: When I **go** home, I will make dinner.
5. You know whose dog this is?
Answer: **Do** you know whose dog this is?

EXERCISE - 2

1. I tried to interrupt into their conversation but was told on.
2. It is important to take pride of whatever we do on life.
3. I left home at Sunday morning to catch a flight for England.
4. He was scolded from the teacher for failing to pass the test.
5. For all that excitement. I had forgotten to take my present for him.
6. My parents are not in good terms so we tried to patch things on.
7. I accused her with stealing my wallet but she insisted about her innocence.
8. I sympathize for you over your mother's death.
9. He is one of the best players of Singapore and he takes pride of it.
10. In ten o'clock in the morning. I went to the beach to catch fish by my net.

ANSWERS

1. I tried to interrupt their conversation but was told **off**.
2. It is important to take pride **in** whatever we do **in** life.
3. I left home **on** Sunday morning to catch a flight **to** England
4. He was scolded **by** the teacher for failing to pass the test.
5. **In** all that excitement, I had forgotten to take my present **from** him
6. My parents are not **on** good terms so we tried to patch things **up**.
7. I accused her **of** stealing my wallet but she insisted **on** her innocence
8. I sympathize **with** you over your mother's death
9. He is one of the best players **in** Singapore and he takes pride **in** it
10. **At** ten o'clock in the morning. I went to the beach to catch fish **with** my net.

Career lab

GROUP DISCUSSION

Group discussion

WHAT IS GROUP DISCUSSION?

The GD Process

In a Group Discussion the candidates are divided in groups of 8 to 10 and each group is tested by panel of Judges. Usually topics of general interest are given by the panel to the group and the group is asked to proceed with discussion. Every candidate is supposed to express. Nowadays Group Discussion is being extensively used along with personal interviews for the final selection of candidates. It plays a main role in selecting the best among the best. Having scored high marks, students who get selected for a higher/another course or employment are placed on a par - on equal footing - based on their age, qualification and experience. It becomes necessary to conduct further screening for choosing a few among many. It is here, the Group Discussion plays an important part. It helps in choosing the socially suitable candidate among the academically superior achievers. It is one of the best tools to study the behavioral and attitudinal responses of the participants.

Rightly speaking, Group Discussion is more a technique than a conventional test. In fact it is one of the most important and popular techniques being used in a number of personality tests. It is a technique or a method used for screening candidates as well as testing their potential. It is also designed as a situation test wherein a sample of a candidate's group worthiness and potential as a worker comes out quite explicitly. His opinion and views on the topic given. The time for discussion is approximately 20 minutes. During the discussion, the panel of Judges quietly observes the performance and behavior of the candidates and makes his own assessment. A group discussion can be categorically divided into three different phases :

- i. Initiation/ Introduction
- ii. Body of the group discussion
- iii. Summarization/ Conclusion

Let's stress on the initiation and summarization:

Initiation Techniques

When you initiate a Group Discussion, you not only
If you can make a favorable first impression with your content and communication skills after you initiate a Group Discussion, it will help you sail through the discussion. But if you initiate a Group Discussion and stammer/ stutter/ quote wrong facts and figures, the damage might be irreparable.

If you initiate a Group Discussion impeccably but don't speak much after that, it gives the impression that you started the Group Discussion for the sake of starting it or getting those initial kitty of points earmarked for an initiator!

When you start a Group Discussion, you are responsible for putting it into the right perspective or framework. So initiate one only if you have in depth knowledge about the topic at hand.

There are different techniques to initiate a Group Discussion and make a good first impression :

1. Quotes
2. Definition
3. Questions
4. Shock statement
5. Facts, figures and statistics
6. Short story
7. General statement

Group Discussion in a nutshell.

Keep the following points in mind while summarizing a discussion:

- Avoid raising new points.
- Avoid stating only your viewpoint.
- Avoid dwelling only on one aspect of the Group Discussion.
- Keep it brief and concise.
- It must incorporate all the important points that came out during the Group Discussion.

Do's and Don'ts in Group discussion

The Don'ts

- Don't be nervous, shy or emotional.
- Don't try to bluff as the panel will easily figure out that
- Don't allow the criticism bother you
- Don't be frivolous, keep yourself to the point
- Don't criticize other members
- Don't use foul language or slang, like yaar, princy, shit etc.
- Don't loose your temper or calmness.
- Don't ridicule or make fun of any of the members
- Don't impose on others yourself or your arguments
- Don't interrupt a participant, unless he finishes his speaking.

The Do's

- Stick to the point and address the group as a whole.
- Be logical while reasoning
- Be assertive while putting your views
- Listen to others attentively
- Motivate others to speak
- Keep calm and polite
- Be positive and provide full contribution to the entire discussion
- Use body language to your maximum advantage
- Speak in Clear terms
- Maintain a cordial atmosphere, cooperate with all, in order to reach the final goal.

WHICH IS GOOD, WESTERN OR URBAN CULTURE

A: It's not at all western culture responsible for our decay. It's the people mindset over which is decaying day by day. Western culture has brought a number of good things like elimination of curtain system, dowry, and widow-burning system. It changed our mindset to equality of male and female. Just because of this western culture many of Indian families have become broadminded for their daughters and daughters-in-law and the girls have courage to join offices and are ready to work late night also.

I have seen many people speaking fluent English but still wearing salwar suits. And if people are adopting a change in dress so there is nothing wrong with it. It's their personal choice and they are wearing it because they are comfortable in it. As well as drinking and smoking habits are the effects of western culture. Before Britishers entered our country drinks were there in people's habit. So we should not blame them. Also the eating habits may have changed but people now know the affects of junk food. Moreover people in India don't eat junk food regularly they eat it in parties etc. there is nothing wrong with it.

B: Western culture changed our dressing style, our food habits and also our young generation no longer respects their elders. It has introduced corruption in our society and many other bad things that has destroyed our culture.

C: Western culture, now a day's its being followed by us but not before by our parents or by our grandparents. Let me come to the solution that who wants to follow the western culture, please follow the both positive and negative. I mean the people who were following only negative of western. Else return back to the culture of Indian. Sure it will give you everything you want. Expect the negative you expect.

D: India is the cradle of human race, the birth place of human speech, the mother of history, the grandmother of legend and great grandmother of tradition. Our most valuable and instructive materials in the history of man are treasure up in India only.-Mark Twain. We owe to Indians who taught us to count, without which no worthwhile scientific discovery could have been made- Albert Einstein. Many famous personalities have described India and Indians.

E: People take culture as living behind the curtains, being dressed from tip to toe, not having beverages other than tea n coffee, learning only folk dance forms. But guys we are way ahead of that time. We are not living in an ataxic world. Change is the law of nature. And when we are changing that doesn't mean we have to adopt only the negative aspects of other cultures, there's a big spreading all the cultures worldwide that can be adopted.

Why not try to bring a change in positive sense? Why should we always become a complainer! We Indians are much more than what people think of us. We have to show this to them. Not by cursing changes that have come in our culture. But by appreciating and motivating others.

F: Indian heritage is decaying at a higher pace. As Indian languages are neglected, Sanskrit has been putted as third language in schools. Even Hindi is not taken as the medium in interviews and even Hindi exams is not taken while giving the entrance exam for taking admission in schools.....

A: My prospective is our culture is not decaying. We are just adding some other cultures to our culture but it is not totally wrong. We can follow good things from any one. Follow the other culture without damage our culture is not wrong.

B: Culture- It's very horrible to see my Indians looking on other country culture. It's persist in villages but somewhat lost to follow in cities. Whether my country did not have any cultural habits? It's the soil which is oldest of oldest. We have all kind of moral in our culture. Nothing is unbelievable or un-moralized practice which we have practicing so far, the mistake which our grandma, and grandpa did is without teaching the inner aspect of it, there are just ask us to practice. My Indians please look on our culture; otherwise your generation will too forget to follow our cultural habit like you and at one situation our culture will destroy completely and a new modern culture will be there. Swami Vivekananda told once if you fail to follow your culture, within three generation your generation will destroy.

C: What is western culture, we actually know the half truth or less than that, we only compare our culture to others and even we don't know our culture in true senses. It's not the point that what culture you adopt and what abandon, what matters is the right or wrong. No culture in this universe is perfect, every culture have some good practice and some bad but in our case we only adopt wrong practices and say that culture is wrong or our culture is decaying. We have lot more openness and awareness than 19th century, not because our culture has taught us but because we knew the difference and adopted right. Our lot more social problems solved because of this openness. Our leaders went in past to outside and recognized the need of improvement otherwise we would be living in same culture.

D: I am not satisfied with the western cultures in terms of dressing style, food, the night clubs whereas with the fast development in India I am very happy because earlier only rich peoples get all this luxurious but now middle and below the middle is also taking this luxurious because of the fast development.

E: Indian cultures have flourished than it could have possibly decayed. The most evident witness for what would be that India is the =world second fastest developing nation in the world. Indian culture is second to none when it comes to ethics, but we got to recheck it when we take into account the social evils that are crippling our cultural system. Some of the most common are pardah system, child marriage, honour killing, caste system, inequality in various fields, dowry system, sati etc.

Western exposure have played an prominent role in inducting in our culture system an idea of equality and integrity, which have helped us to fight our social evils. We have learnt from them democracy, industrialization and importance of science and technology, without which we could have been living in the ages of kings.

SO I don't understand when people ask to resist western culture, I say we should learn from them openness, integrity, hard work and to be independent. If they are advanced nations we should learn from them technological advancement, creative imagination, competitive spirit and a curious heart.

F: I think so that Indian culture is definitely destroyed by western culture because in this world everything have their own rules and regulations to do work so every culture have their own rules so we are Indians and we have to fulfill the demand of our culture... I am also suggest that really shows also spoil are young generation like roadies,splitsvilla etc., because they are really spoil are nation by their point of view and their ideas they have always rough ideas in their mind... these just for fun..In this they use abusing language which is not good for young generation.

A: But we should totally disregard their culture just because it is in WEST. We have to choose the best for ourselves and see that our life improves. There is nothing wrong if something can help you out. Parties as WEST insist that it's for fun and rest. Yes it is. But our parents in India still don't like their daughter or son to walk home late in the night; some parents allow their children so that they experience it and know to bind within the limits.

B: Indian culture is one of the most cherished and it is very popular in most parts of the world. We are lagging behind in our culture and we are attracted towards western counties. We are striving hard to win one Olympic medal. This shows our laziness. So, today's youth is tomorrow's citizens. So please don't ignore our culture.

C: Culture is the true asset of human. It is our responsibility to keep it with us. But due to western culture we denied it. I think it is not true because we want to progress for achieving this progress we do adjustment without culture if we do not do this we are not succeed in our life, Iwillexplain it by giving example, suppose we are doing job in MNC so we take drink, dancing late night party are involved if we do not do this so it not good for our profession.

D: I agree about this fact but not completely. We should avoid western culture, not because of the world present ahead it "WESTERN". Our culture also teaches us to respect other culture. Our culture is decaying because our young generation spoiling himself. One thing we should notice that INDIA is lagging behind, but western countries are forward toward their work. So we should avoid bad habits of western culture just like drinking alcohol, bad manners, and junk food. For this we respect our culture and accept it truly not superficially.

E: According to me, our culture is decaying but it has both bad and good impacts on our society. Good effects are that it has abolished inequality, sati system, dowry system, caste system etc, from our society. It has introduced equality in the society because of which nobody is inferior and superior. It has introduced democracy, integrity etc, in our society.

F: Yes, India's culture is a very respectful culture respected by all over world but recently western culture has dominated the Indian culture in every spheres of life in music, food-habits, our dress and customs. We are losing our own culture by accepting western culture. Gandhi has rightly said that, "keep the doors and windows of your house open to allow the breeze to enter freely but take care that you will not fly away to that wind".

CONCLUSION: Indian culture is one of the most cherished and it is very popular in most parts of the world. Western culture, now a day's its being followed by us but not before by our parents or by our grandparents. Let me come to the conclusion that who wants to follow the western culture, please follow the both positive and negative. I mean the people who were following only negative of western. Else return back to the culture of Indian. Sure it will give you everything you want. Expect the negative you expect.

INTERVIEW SKILLS

Interviewing Do's &Don'ts

What to Do....

- Do express yourself clearly with a strong voice and good diction and grammar.
- Do pay close attention to your personal appearance; dress to your advantage.
- Do make concrete goals in planning for your career.
- Do offer a firm handshake.
- Do look the interviewer in the eye (but don't stare him or her down).
- Do fill out applications neatly and completely.
- Do have as much knowledge about the industry, employer, and position as possible.
- Do take criticism gracefully.
- Do equip yourself with a strong knowledge of the company.
- Do have prepared questions about the employer and position.
- Do display a sense of humor.
- Do display self-confidence.
- Do bring a pen and small notebook with you to the interview.
- Do remember the interviewer's name and use it during the interview.
- Do take time to think before answering difficult or unexpected questions.
- Do take an extra copy of your resume and a list of references with you to the interview.
- Do follow-up with a thank-you note restating your interest in the position.
- Do contact the employer by phone if the interviewer does not contact you one week after the time from which he or she indicated you would be notified.

What Not To Do....

- Don't be overbearing, overaggressive or conceited.
- Don't show a lack of interest or enthusiasm.
- Don't emphasize money as your main interest in the job.
- Don't expect too much too soon - be open to the idea of starting at the bottom and working your way up.
- Don't make excuses for unfavorable factors on your record.
- Don't condemn past employers or institutions of education; keep comments positive.
- Don't display a marked dislike for schoolwork.
- Don't be indecisive.
- Don't display intolerance or prejudice.
- Don't interview unless you are interested in the job...don't just "shop around."
- Don't be late to the interview.
- Don't state specific geographic restrictions.
- Don't contradict yourself in responses.
- Don't take notes during the interview - jot down your notes immediately after the interview.
- Don't forget: YOU control the content of the interview.
- Don't glorify your past experiences - getting into a job for which you are under qualified is not recommended.
- Don't assume that all employers will be delighted to hear of your plans for graduate school.
- Don't smoke; chew gum, etc. even if offered or if the interviewer does so.

How to Answer the Most Common Interview Questions?

1. So, tell me a little about yourself.

I'd be very surprised if you haven't been asked this one at every interview. It's probably the most asked question because it sets the stage for the interview and it gets you talking. Be careful not to give the interviewer your life story here. You don't need to explain everything from birth to present day. Relevant facts about education, your career and your current life situation are fine.

2. Why are you looking (or why did you leave you last job)?

This should be a straightforward question to answer, but it can trip you up. Presumably you are looking for a new job (or any job) because you want to advance your career and get a position that allows you to grow as a person and an employee. It's not a good idea to mention money here, it can make you sound mercenary. And if you are in the unfortunate situation of having been downsized, stay positive and be as brief as possible about it. If you were fired, you'll need a good explanation. But once again, stay positive.

3. Tell me what you know about this company.

Do your homework before you go to any interview? Whether it's being the VP of marketing or the mailroom clerk, you should know about the company or business you're going to work for. Has this company been in the news lately? Who are the people in the company you should know about? Do the background work, it will make you stand out as someone who comes prepared, and is genuinely interested in the company and the job.

4. Why do you want to work at X Company?

This should be directly related to the last question. Any research you've done on the company should have led you to the conclusion that you'd want to work there. After all, you're at the interview, right? Put some thought into this answer before you have your interview, mention your career goals and highlight forward-thinking goals and career plans.

5. What relevant experience do you have?

Hopefully if you're applying for this position you have bags of related experience, and if that's the case you should mention it all. But if you're switching careers or trying something a little different, your experience may initially not look like it's matching up. That's when you need a little honest creativity to match the experiences required with the ones you have. People skills are people skills after all, you just need to show how customer service skills can apply to internal management positions, and so on.

6. If your previous co-workers were here, what would they say about you?

Ok, this is not the time for full disclosure. If some people from your past are going to say you're a boring A-hole, you don't need to bring that up. Stay positive, always, and maybe have a few specific quotes in mind. "They'd say I was a hard worker" or even better "John Doe has always said I was the most reliable, creative problem-solver he'd ever met."

7. Have you done anything to further your experience?

This could include anything from night classes to hobbies and sports. If it's related, it's worth mentioning. Obviously anything to do with further education is great, but maybe you're spending time on a home improvement project to work on skills such as self-sufficiency, time management and motivation.

8. Where else have you applied?

This is a good way to hint that you're in demand, without sounding like you're whoring yourself all over town. So, be honest and mention a few other companies but don't go into detail. The fact that you're seriously looking and keeping your options open is what the interviewer is driving at.

9. How are you when you're working under pressure?

Once again, there are a few ways to answer this but they should all be positive. You may work well under pressure, you may thrive under pressure, and you may actually PREFER working under pressure. If you say you crumble like aged blue cheese, this is not going to help you get your foot in the door.

10. What motivates you to do a good job?

The answer to this one is not money, even if it is. You should be motivated by life's noble pursuits. You want recognition for a job well done. You want to become better at your job. You want to help others or be a leader in your field.

11. What's your greatest strength?

This is your chance to shine. You're being asked to explain why you are a great employee, so don't hold back and stay do stay positive. You could be someone who thrives under pressure, a great motivator, an amazing problem solver or someone with extraordinary attention to detail. If your greatest strength, however, is to drink anyone under the table or get a top score on Mario Kart, keep it to yourself. The interviewer is looking for work-related strengths.

12. What's your biggest weakness?

If you're completely honest, you may be kicking yourself in the butt. If you say you don't have one, you're obviously lying. This is a horrible question and one that politicians have become masters at answering. They say things like "I'm perhaps too committed to my work and don't spend enough time with my family." Oh, there's a fire able offense. I've even heard "I think I'm too good at my job, it can often make people jealous." Please, let's keep our feet on the ground. If you're asked this question, give a small, work-related flaw that you're working hard to improve. Example: "I've been told I occasionally focus on details and miss the bigger picture, so I've been spending time laying out the complete project every day to see my overall progress."

PRESENTATION SKILLS

Dos & Don'ts for Oral Presentations

DO:

- Use text on slides/overheads that is large enough for the audience to see/read
Select colors/slide backgrounds that are easy for the audience to see and read
- Use figures, diagrams and pictures (rather than always using text) to illustrate and explain information where serviceable – remember “a picture is worth a thousand words”
- Speak clearly, loudly and at a reasonable pace
- Feel that it is acceptable and even beneficial to present information in ways that may be different from those used by the author(s). Every author has particular ways of saying things, making points, describing or illustrating results or theories, etc. However, it isn't always the case that the means of conveying information used by the author(s) is the best, simplest, clearest, etc.
- Use titles, labels, etc. to make sure that the information on your slides or overheads is clear
- Know your article, and be able to answer questions about the information you presented as well as other information in the article that you may not have included in your presentation
- Explain what key points the audience should be focusing on or taking away from graphs, figures, illustrations, etc. (as opposed to simply displaying such things and hoping or assuming the audience knows what they should be seeing and what is relevant)

DON'T:

- Overuse distracting animation effects
- Have too much text on your overheads – this encourages your audience to read rather than attend to the speaker
- Simply read your presentation to the audience: this is not engaging and often leads the audience to stop paying attention
- Speak too fast: remember, you are much more familiar with the article, the topic and the presentation than is your audience so what seems a reasonable pace for you may be too fast for your audience to follow
- Use a strategy where you go through the article, highlight or select sentences or portions that seem important, and simply paraphrase each one and present these bits in order. In essence, your job is to tell the audience a story for which the following issues are clear and obvious: a) what is the issue/problem/question in the article, b) what research was done, c) what was found and d) what do these results mean with respect to the main issue/problem/question. In order to tell such a story, you can't simply treat these topics as disjoint sections. Instead your "story" should have the effect of (among other things) linking these sections to one another.
- Face the presentation screen or have your head buried in front of a lap top for your presentation: again, this is not engaging for the audience and they will quickly lose interest (and the ability to follow your presentation)

COMMUNICATION KEY
WAY TO SUCCESS

The importance of good communication skills for employability

Communication is an important facet of life. Communication skills are essential in all spheres of life. Be it an interview or dealing with the project leader or working out a solution with a team or writing a report, getting across the point effectively is what matters.

The success of an Endeavour hinges on the ability to communicate effectively in today's fast paced life, everyone is asked to do more with less. In such a scenario effective communication holds the key. Effectively communication centers round the usage of words, speed of delivery of words, pitch modulation and body language. Using the right tools to communicate the right messages at the right time can salvage crises and motivate people to work towards success. Truly said, communication works but for those who work at it. In the existing globalization scenario, most of the Information Technology, I.T Enabled Services, management institutes, public and private sector, multi-national Companies, Union Public Service Commission, and State Public Service Commission are search for a right and suitable fresher for executive posts. Whatever be the recruiting criteria that I.T, ITES, industry giants had in their agenda, once this was clear a first class degree would not serve the purpose, the candidate have to satisfy the skill sets that the companies were looking for. And unanimously, the skills set that they were looking for communication skills.

Importance of Communication

In the present day information revolution and formation of knowledge societies, centers etc, the importance of communication has increased manifold. The importance of communication management and in day to day life of people can be judge from the following points.

Communication Raises aspirations:

- Project the future in the present
- Raise awareness. Meet information needs.
- Motivates the people for a purpose.
- Communication is for development of the individual organization, society, nation, country.
- Communications helps the administration in arriving quick decision and implementation.
- Good communication is essential for proper planning and coordination.
- Effective communication has a special role play, particularly in an under developed country like India where most of the workers are illiterate.
- A Manager's/ Executive's success is conditioned by his ability to understand the needs and requirements of both employees and customers.
- Better communication helps better job performance.
- Effective and timely communication promotes cordial relations and work culture among the employees for increasing production and creates healthy and happy environment within and outside the organization.
- 'Communication' is a key instrument to create relations, to strengthen relations between the two people or a group of people. Without communication methods, there is no human relations and human relations rehires effective communication methods, tools, positive words, skills etc.

Students Problems in Communication (Individual):

I have diagnosed a number of problems which acts as hurdles for effective communication. Individual problems of students are given below:

- Some students write well, but they are not able to express themselves orally.
- Some speak fluently, but cannot write without grammatical errors.
- Some are comfortable speaking among themselves in a small group, but are not comfortable facing the audience.
- Some having problems with their body language and use inappropriate with others, some find it difficult to maintain eye contact.
- Some are always misunderstood.

Communication Skills:

To be successful, a person requires an integrated set of communication skills. These skills comprise, writing skills, speech skills, listening skills, non verbal skills. One should have communication skills, while reading, writing, listening, speaking, conversation with various groups of people, government officials, bankers, family members etc.

Writing Skills

Writing in other words, is above all for communication for conveying ideas and feelings from one mind to another mind. The hall marks of good writing are the hall marks of good communication.

- Accuracy, appropriateness, attentiveness, to your audience, avoiding of ambiguity.
- Brevity or conciseness, brightness or buoyancy.
- Correctness, clarity, consistency, concreteness
- Early morning works well for many
- Plan to write three to five notes minimum daily.
- Shorter sentence pack more power. They are also easier to read and understand
- Should be clear, brief content, conceptuality, important points to be covered.
- Use sweet words, simple language, be legible, be clear and be concise and readable.
- Write and rewrite until you are able to capture the idea in one sentence.

Reading Skills:

Reading is skill by itself, which requires aspirants to make simple changes in their approach to master the talent. For a better grip over communication and languages skills, a student should give sufficient time to reading every day. This should be done on a daily basis so that the memory gets refreshed with the knowledge. This is why reading occupies a prime place in the skills set of a person. The youth are advised to bear the following tips while reading.

- Read inspirational or motivational books
- Subscribe to newspaper, newsletters, and periodicals journals of your interest to update your knowledge.
- Read the life history of great leaders, scientists, academicians, technocrats etc.
- Underline the important points, note down the difficult words, and consult the dictionary.
- Habituate concentration improve vocabulary.
- By reading book, one can improve his way of expression.
- Books are temples of knowledge.
- Books motivate the young mind and activate to read the subject, language and also enhance reading habits.
- Books play a vital role in the mental development of youth.
- The great ideas will definitely help the readers in later life. So read, mark, learn and inwardly digest what is there in the books.

Speaking Skills:

The importance of art of the speaking is now more keenly felt than ever before. Whether one is an executive, an engineer, a doctor, a lawyer, Software professional, a public relations practitioner, a journalist, an accountant or a politician, he cannot be successful without knowing how to speak. A good speaker is a good listener too. Knowledge, confidence and delivery are the basic elements of an effective speech and that requires training. One has to develop self-confidence and try to remove fear of psychosis slowly. The following points to be know in mind before you speak.

- Think before you speak.
- Know your message
- Know something about the audience.
- Get the points quickly. Then, it is easier for the listener to remember what you said.
- Use easy language and use simple words.
- Give importance to the subject and Voice should be sweet.
- Modulate your tones as per the topic.
- Illustrate with examples.
- Stick to the time schedule.
- Have the facts and respond well to questions.

Listening Skills:

Listening skills are one of the important parts of communication processes. Here are some of the characteristics of a good listener.

- You must have patience.
- Openness and desire to understand.
- Concentration, intelligence and maintain eye contact.
- Resist distractions and encourage speaker.
- Summarize to clarify.
- Have empathy
- Take time to listen
- Look attentive
- Don't interrupt
- Show interest
- Listening and expression is given paramount importance in team work and building better inter-personal relations at the work place.
- Team aspirations can be met only by proper listening. This gives a chance to think of better ideas both at individual and team levels.

There are several ways of listening which come into play in different situations and serve different roles at the work place. These are: Passive, Informative, Evaluative, Appreciative, Emphatic and Therapeutic.

Conversation skills

"Conversation" is defined as 'an informal talk involving a small group of people or only two on a particular subject or selected topics'. The aim of this skill is to help you to become a good conversationalist.

Conversation should be like a Tennis match, each person having his turn to give and receive. The true art of conversation is talking and listening. Good conversation requires delicacy and tact, give and take.

- Allow your conversation partner to speak.
- Respect the other person's point of view.
- concentrate on the conversation. Only hearing rather than listening will cause you to miss vital information.
- Find out what your listener wants. To gain the most from any conversation,

- focus on your listener. Ask questions and listen to the responses.
- Define terminology so there is less chance of misunderstanding.
- Speaker and listener should maintain cordial and friendly atmosphere.
- Clarify each other any misunderstandings and solve the problems by accepting amicable solution.

INTERVIEWS - ROLE OF COMMUNICATION

The interview is a two way process of communication where you need to introduce yourself to the company. There are three types of interviews for professional jobs and executive positions like information technology, science and technology, medicine, engineering, agriculture, chartered accountants, company secretaries, business, marketing, sales communicators, management, public relations, civil services etc.

The types of interviews are - (1) Personal interview (2) Subject/ Technical Interview and (3) Group Discussion. In all the three interviews, your intellectual abilities, communication skills, language skills, way of walking into interview hall, initiative and drive etc., will be observed and judged. you must be well prepared and present with an objective of "first impression is the last impression".

Preparation and confidence

Interview is a major obstacle for many job seekers. Although you have the qualifications, experience, and proven track record, you may lose 'better interviews'. So what does 'interviewing better' actually mean? It comes down to you being well prepared and confident. You can answer questions in a way which is acceptable but not necessarily right to the interviewer, and you also know something about potential employer's business and hope to fill the post.

Continuous learning and practice is essential for a person who seeks employment. You should spend 18 hours per day and do hard work, home work, team work, smart work and net work.

- Utilize the facilities that are available and avail the opportunities in developing the knowledge, update the knowledge, preserve the knowledge and apply knowledge.

- Do not go to the interview laden down with baggage - psychological as well as physical. Take the bare minimum belonging necessary. Concentrate on the interview at the interview - nothing else.
- If you are asked to bring original certificates, references, passport size photos etc. get them ready the day before. Take your interview letter.
- Plan to reach the city where the venue of the interview is fixed, a day in advance to avoid last minute tension and reach the venue half-an-hour easy on the day of interview.

1. Personal interview

Personal interview plays a critical role in the selection process of the company. Personal interview is conducted by the human resource department of the company. Some of the areas you may be evaluated on the personal interview are:

- Communication skills
- Reasoning ability
- Leadership abilities
- Assertiveness
- Flexibility
- Nurturing ability
- Creativity
- Ability to receive and give constructive criticism
- Stress management
- Ability to motivate oneself
- Time, resourcefulness and priority management skills
- Personality - inner and outer beauty.

Rehears yourself two or three days before attending interview. Build your self-esteem and confidence. This includes your strengths and weaknesses, your accomplishments, reviewing your strong and weak subjects and recording some of the key decisions you have made in your life. You should also review interests, the disappointments you have encountered in the past, your work environment, likes and dislikes, your business and personal values, human values and ethics, your goals, needs restrictions and life style preferences.

2. Subject / Technical interview

Your technical / subject competence, strategies, professional skills, your projects, assignment which you have prepared during your studies, earlier experiences and impressions gained in internship programme, creativity, initiative, drive, interest in the subject and improving knowledge etc., will be tested in depth. Your concepts and mindset will also be judged.

The interview will be handled by a team of technical experts or subject matter specialists of the organization.

3. Group Discussion

Group Discussion is all about communicating with a group of people. Group discussion is not just talking about a given topic or expressing one's version. In academic circles it is popularly known as GD. Normally, in a group discussion, a candidate is tested in terms of group behaviour, communication skills, content collection and leadership attributes. A set of persons brought together to express their opinion and the subsequent exchange of views on an allocated subject is

In addition to be above, non-verbal communication skills are also watched with meticulous care.

- Smile
- Shake hand
- Your posture
- Eye contact with the interviewers
- Avoid fidget (Fidget means - moving hands, your nervousness, unable to remain quiet, playing with key chain or pen top, adjusting hair, lip movement.
- Nervousness and appearance will also be judged.

GD is all about communicating with a group of people. Eye contact and body language play an important role. Most candidates tend to look at either the interviewer or any single member of the group but that again shows lack of confidence. 'Dos' and 'Don'ts' for GD is given below for guidance to the candidates.

Positive language

Words are the best tools of communication. choose words carefully. Words can hurt and words can heal. What are the characteristics of positive language?

people who use positive language are effective communicators. Their message, written or oral, would be polite, pleasant, practical, persuasive and powerful. Your positive attitude makes you think positively. Your positive language creates a positive impact on the receiver and it helps you to attain your goal and achieve success.

An effective communicator checks whether his/her message is received positively or negatively. Language is a powerful tool and it can help people to make wonders. Communicating in as positive way helps people project themselves positively. People who use positive language play a constructive rather than a destructive role.

Negative words hurt the feelings of the recipient and tell the person that he or she has done wrong. Positive words encourage the person and tell him or her that they are respected. Positive words have a healing touch. Choose the words carefully.

ENGLISH - a global language

Language is an expression of human activity. English language has become popular and routine in day to day official communicating and in routine life also. In fact, 1.1 billion people of India speak and communicate in more than a thousand languages and the fine line separating dialects from real languages is sometimes indistinguishable. Before independence, English was a foreign language. With the advent of globalization, English has become a global language. Hence it appears to be the best bet as a link language. In fact, it still remains a strong communicative language.

In India, where the business process outsourcing (BPO) and Information Technology boom has led to a demand for 'trained' English language speakers and 'Learned' workers, particularly, the youth should understand the accents, characters and cultural differences. People who want to learn the language have to expose themselves constantly to English, read, listen and grab every opportunity to speak.

Conclusion

Language skills and communication skills are essential for getting good placement in the information technology and I. T. Enabled Services, M. N. Cs., public sector and private sector industries etc. Everyone should revise the language habits from time to time, in accordance with changing life pattern and customs. As mentioned earlier, language is an expression of human activity and because human activity is constantly changing, language also changes along with it.

Every communicator must know the significance of language which is essential for effective communication. There is no life without communication and communication flows like a river. Hence communication is the life line of management and it is vital for good management. Unless and until one should master the communication skills, he/she cannot get employability. He/ she should develop communication and language skills practicing the following:

- While interacting with someone, give importance to the message.
- Don't be pre-occupied with grammatical accuracy.
- Once you become fluent, you should try to improve grammar.
- Accept yourself as you are.
- Practice is very important. Whenever you get an opportunity to speak in front of others, make use of it. Face the audience boldly.
- Keep a good dictionary with you as your companion.
- Read newspapers, read stories, articles, news-items, watch news on T.V. , Radio, Develop your listening skills.
- Mingle with others freely; it helps you to develop interpersonal and group skills.
- Cultivate habit of reading books. By reading books, you can improve and develop 'Creativity'.
- Selection of right books, good books to read is the key factor to success.
- Motivate the young minds and activate to learn subject and language.
- The great ideas will definitely help the reader in his later life. So read, Mark, learn and inwardly digest what is there in the books.
- Books are temples of knowledge. Visit the Library regularly at fixed hour.
- Now-a-days, knowledge is open for all in so many forms. You need to acquire desired knowledge from vast sources available.

Wireless Technology

Wireless Technology

Wireless technology Sensor Networks (WSN) has been gaining popularity in the world as more mobile wireless communications are preferred to wired connections. WSN are small embedded devices with wireless connectivity enabling them to form a network within themselves. Currently in the market, there are many vendors (Crossbow, moteIV, etc) provides such WSN motes or nodes (which they are usually called). Such motes generally have a single processor with one or more sensors integrated (temperature, magnetic sensors, accelerometers, etc), a battery pack, wireless connectivity (Zigbee, IEEE802.15.4 radio) and a programming board. One of the most common operating systems developed for such WSN is called TinyOS which is based on the nesC Programming structure. NesC (in TinyOS) programs are designed for low power, ad-hoc networks. They are written specifically to handle small tasks, being responsive to sensor inputs and event oriented. The characteristics of TinyOS are scalability, combining the best of networking/communication, power management, sensing and actuation with low power, little memory, limited processing microprocessor. One typical example of a task is simple data gathering of the sensors and transmitting the data of the sensors to a mote connected to the PC (which is normally referred to as the base station). The purpose of this paper is to use collaborative clusters of intelligent sensor nodes concept to achieve distributed process monitoring. This would involve 2 steps, the first being the usage of sensor nodes to measure certain parameters that is of interest. The second step is to pre-process the data gathered before sending them to a higher order node in the network. This paper is organized as follows: Section 2 gives a background of chemical plant simulation used in our project. Section 3 focuses on the role of WSN in plant monitoring. Section 4 briefly explains the role of FPGA as the secondary processor. Section 5 describes the implementation of the concepts. Section 6 discusses the results. Section 7 discusses about future works and Section 8 concludes the report.

CONCLUSIONS:

This paper has discussed the implementation of FPGA based wireless sensor node with a simulated chemical plant process monitoring application. The paper has also demonstrated the real-time processing of sensor data with WSN in order to provide self-learning, self-checking and trending for fault detection. Additionally, the paper has also proposed and presented a working solution in enabling rapid creation and customization of wireless sensing applications. Future work on conversing complex algorithms for FPGA together with more physical nodes will improve the real-time sensor data processing and monitoring. The results could include improved distributed manufacturing monitoring or even other types of real-time monitoring. The research provides the platform for future general purpose scientific research.

RESUME WRITING

Cover letter for resume

Date :
Name :
Title :
Organization :
Address :
City, State, Zip Code :

Dear Sir,

I am interested in the assistant position advertised in XXX. I am currently employed as Legislative Director for Assembly XXXX, Chairperson of the NYS Assembly XXX. I accepted this position because of the emphasis on the writing and research skills which are applicable to your requirements for an author's assistant. My experience in the NYS Assembly has afforded me the opportunity to become familiar with the consolidated and unconsolidated laws of the State of New York. I also have extensive experience in legal and policy research.

In my position as Legislative Director for Ms. XXX, I prepare her personal legislation which deals with issues relative to her position as Senior Member of the NYS Assembly Standing Committee on XXXX. In as much as she is Chairperson of the XXX Committee I am, of course, heavily involved in the current welfare and Medicaid reform movement.

In response to your search for a part-time assistant, I believe my experience in the Legislature, and my research and writing skills qualify me for consideration. If you would like, I can provide with current samples with my work.

To further acquaint you with the specifics of my background I am enclosing my resume. I hope you will consider me for this position. I look forward to meeting with you and discussing my qualifications in more detail.

Thanking You

Yours Sincerely,
(Signature)

Mr. A. Chris Marshal

37, car Street, Madurantakam-603311.

Cell: 99406XXXXX

Email: name@gmail.com

Have vast professional experience in Civil engineering. I have operated with diversified domain projects in Civil Engineering ranging from medium to large scale industries which gave me an in depth understanding for handling various domain areas in Civil Engineering. I have handled various critical and challenging projects from design stage to implementation stage and ensured that the projects gets implemented as per specification in stipulated time with quality. Having equipped and expertise with various latest engineering tools and techniques, cost evaluation techniques and tools which I applied in my professional career to produce cost-effective solutions for the organization I worked with. I can handle high pressure environments with ease and open mind and also a good team player. I have efficient communication skill to present my points precisely to listeners.

Objective:

Seeking to take up managerial position in the field of Civil Engineering and take challenging, creative and diversified projects.

Education:

B.E., Civil Engineering, Anna University, 1994

M.E., Structural Engineering, Anna University, 1996

Skills:

Expertise in AutoCAD

Could operate effectively with Microsoft office tools namely word, excel, power point, access.

Have sound knowledge on Dos applications and programming language C and C++

Efficient management and organizational abilities

Excellent written and communication skills in English

Have good problem solving with analytic thinking

Open minded to work in complex environment and projects

Achievements:

Have got Gold Medal in Civil Engineering from Anna University, Chennai.(1994)

Work History:

Larsen & Toubro Limited, Chennai, Feb 2003 – Till Date

Senior Design Manager

Responsibilities:

I took the whole project management as Senior Design Manager and was responsible for bringing the project from design stage to final implementation stage. I monitored and ensured that the development is done as per the specification without violating government standards. I coordinated and supervised engineers, contractors, staffs under me and made the process clear that I get the report of daily activity of each staff in my team by end of day.

Consolidated Construction Consortium Limited (CCCL), Chennai, Jan 2001 – Feb 2003

Design Manager

Responsibilities:

As a Design Manager I worked with diversified projects in civil engineering namely projects related to residential, commercial and also industrial projects. This gave me in depth understanding on business areas on all these areas. I used separate approach and techniques for each domain as the rules, code and costing technique for each project differs. I am a good team player and thereby could work well with the team of builders, contractors and management and could implement the development as per design standards with quality and efficiency in stipulated time.

True Value Homes, Mar 2000 – Jan 2001

Senior Design Engineer

Responsibilities:

As a Senior Design Engineer I took up complex engineering projects in the organization. I used specialized engineering techniques to efficiently solve the complex projects in a professional approach. I also provided technical guidance in Civil Engineering area and also trained other engineers in my team and took the responsibility of delivering the final project with quality on time.

Apron Infrastructure Pvt Ltd., Chennai, Jan 1998 – Mar 2000

Design Engineer

Responsibilities:

Designed and implemented an industrial plant project for a big pharmaceutical Industry. This system has various complex and challenging areas for designing and implementing namely designing plant for removal of waste products from the industry, efficient way for preventing air pollution from the pharmaceutical Industry. I took up these challenging designs and put my effort and efficiently and effectively designed the project in the stipulated time and thereby satisfied customers.

Simplex Infrastructure Limited, Chennai, May 1996 – Jan 1998

Design Engineer

Responsibilities:

I used various statistical and engineering techniques to handle the engineering projects given to me by my senior engineers. I also underwent training on handling complex engineering techniques and tools which gave an in depth understanding to solve complex problems with ease and efficiency.

Personal Details
